Graduating Ceremony at University of Tabuk

Shatha Ali Albalawi

Pharmacy Intern, KSAFHNW, Tabuk. Email: shatha.zaal@gmail.com

On June 15, 2023 AD, his **Royal Highness Prince Fahd bin Sultan bin Abdulaziz**, Governor of Tabuk Region, sponsored the graduation ceremony of the 17th batch of students from the University of Tabuk, and their appearance of 6576 male and female graduates, holders of bachelor's and master's degrees, and graduates of diplomas for the year 1444 AH, in the presence of His Excellency the President of the University, **Prof. Abdullah bin Mufreh Al-Dhayabi**, in addition to Vice-rectors, Deans of colleges and parents, in King Khalid Sports City stadium.

His Highness the Governor of Tabuk handed over graduation certificates to the first ranked graduates, congratulating them and their parents, teachers and universities, and stressing on them to continue the stage of work and achieve ambition and dream for the nation's march, and asked God for success for them in their future. His Highness received a souvenir from the university president on this occasion.

His Excellency the President of the University gave a speech in which he started with thanks and gratitude to the wise leadership - may God protect them both - for their efforts in educating the sons and daughters of the country, and to His Highness the governor of the region for his continuous support, sponsorship and participation in the graduation ceremony, calling everyone for success in their upcoming journey.

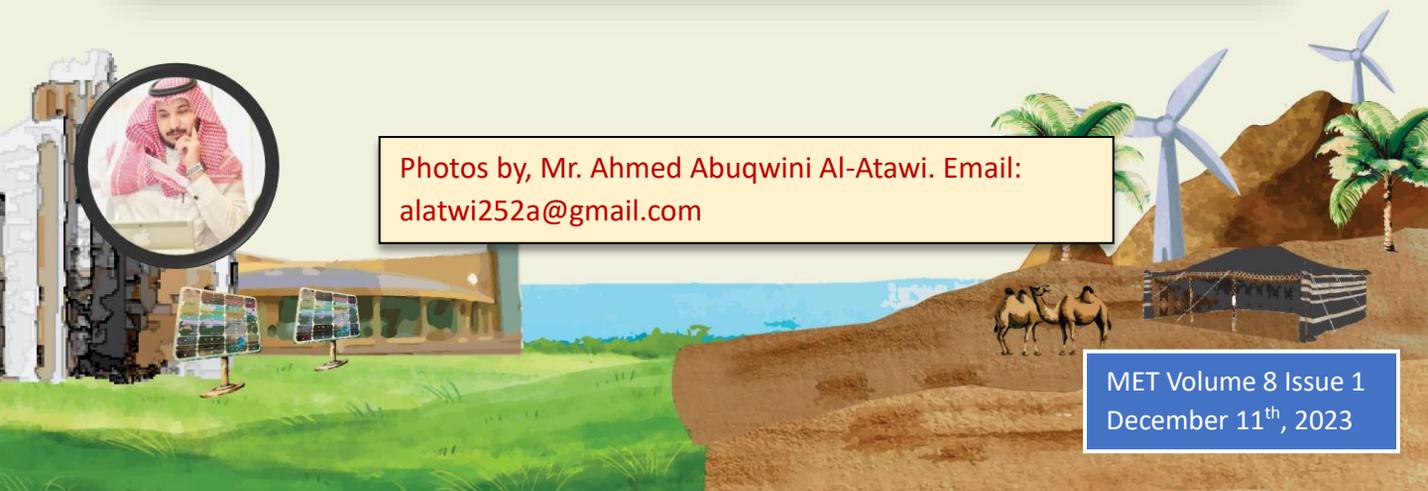

The graduates of the health colleges took the oath, as stated by the Dean of the Faculty of Medicine, Dr. Marai Al-Amri

MET Cover Page Volume 8 2023-2024: Muotman Mohammed, Manager MET. Email: mededutabuk@ut.edu.sa

The Saudi Green Initiative (SGI) is a plan to combat desertification and pollution and improve the quality of life for people in Saudi Arabia. The Green University Initiative at University of Tabuk (GUI at UT), under the leadership of **Dr. Saleh bin Hamed al-Harbi**, Vice President, University of Tabuk, is aligned with SGI. SMJS-MET appreciates the opportunity to be part of GUI at UT.

Volume 8, the cover page of MedEdu Tabuk (MET), reflects our commitment to promoting University of Tabuk students' role in Advancing Environmental Sustainability. The vibrant color scheme in the cover, the pure sky, the clean sea, and the usage of renewable energy sources (windmills and solar panels) highlight a green environment.

The headquarters of SMJS-MET, University of Tabuk, is represented by its iconic landmarks, the new administrative building, and the University mosque, the largest pillarless mosque in the world. We also took the opportunity to portray the rich historical culture of the kingdom depicted by the tents with camels and palm trees. Finally, the cover page pays

tribute to the monumental Saudi space mission visualized by the satellite and space above the sky.

The concept of the cover page came from Dr. Tanveer Raza, the Editor-in-Chief, and the MET team. After receiving feedback from **Dr. Marai M. Alamri**, Dean of Medicine, the design was made by Sara Alshehri, Alumni Editor, SMJS-MET. The final design was discussed with the Editorial members of SMJS-MET and Dr. Laila Albishi, Faculty Advisor of SMJS-MET.

The SMJS-MET team were delighted to inaugurate the cover page of MET in the presence of the highly esteemed Dr. Saleh bin Hamed al-Harbi, Vice President, University of Tabuk.

MedEdu Tabuk (MET) is the official newsletter of the Faculty of Medicine, University of Tabuk. Established in 2016, and after Eight years and more than 100 published issues, MET currently reaches to over 50,000 subscribers. The newsletter acts as an avenue of expression for publishing a wide range of interests of all faculty, students, administrative staff, and the community. MET is part of the SMJS-MET publications that include the peer-reviewed journal, the Saudi Medical Journal for Students (SMJS).

MET started in 2016 as a newsletter for the Academic staff of the Faculty of Medicine, University of Tabuk. With increasing popularity, it gradually included the administrative staff and later the healthcare workers of Tabuk province. By 2018, the newsletter had attracted more than 1000 readers and started inviting its first student Editors. The inclusion of student editors ushered in an era of creativity and dynamism. Student contribution started to increase, and issues containing discoveries, skills, artwork, sketches, and stories of talents, vision, accomplishments, and community service work garnered the attention of other Faculties and Universities. In 2020, the readership of MET skyrocketed to 50,000, reaching out to all students, faculty, and administrative staff of University of Tabuk, and additionally subscribers from the community and readers of other Universities.

Newspaper and newsletter articles are valuable sources of information. Faculty and student resumes emphasize positions and publications, proved through certificates and citations. Applicants face difficulty providing reliable evidence of the much more comprehensive range of contributions, skills, and community services. MET has proved to be a credible source through its archived online content.
