Co-reviewing

The peer-review process is considered to be the most acceptable method of weighing the suitability of a manuscript submitted for publication in a medical journal. In addition, to guide editors in the decision-making process on submitted manuscripts, peer-review often allows authors and editors to improve the quality of reporting. The Peer-reviewers are expected to provide a critical, independent, and unbiased assessment of the submitted manuscripts, and therefore it requires experts with relevant expertise. Peer review has been an integral part of scientific communication that addresses the academic work's quality, validity, and originality. Finding a suitable peer reviewer is one of the most challenging tasks for an editor. This view is shared by the editors of the Saudi Medical Journal for Students (SMJS). Peer review needs expertise, training, and experience. and this can be achieved by "co-reviewing." Co-reviewing means when Invited Reviewers do manuscript peer-reviewing with the help of another reviewer of their choice. The Co-reviewer can be compared to a coauthor of a manuscript when one is not the corresponding author. It is a well-known practice, and Journals are aware of the contribution of the co-reviewer. Usually, most Co-reviewers are Early Career Researchers (ECRs) who find this experience beneficial.

As part of the continued collaborative efforts between the Institute of Languages (IL) and the Deanship of Faculty of Medicine within University of Tabuk, three public speaking events (1 event for each module) were planned for this semester. "The EMD English instructors worked with the students in their presentation" The nominated students (6 Male and 5 Female) gave an oral presentation on a subjects of their choice that reflected their specialization. Students were judged by attendees using a rubric (provided by the IL)

Dr. Marai M. Alamri, Dean of Medicine, praised the initiative as it would improve not only the English language but also the communication skills of the students in general. Dr. Marai was impressed with the choice of topics and the confidence of the students in giving their speeches.

Dr. Abdullah Alatawi, Vice Dean of Post Graduate Studies and Research, Faculty of Medicine, gave valuable tips on improving the student speakers' presentation skills. The events were also attended by the Institute of Languages Dean Dr. Abdulrahman Alfahadi, IL Admin and instructors, and Dr. Md. Tanveer Raza, Editor-in-Chief, SMJS-MET..

STUDY SMART AND GET BETTER GRADES: TIPS FROM A FELLOW STUDENT

Fawaz Tariq Alghabban

2nd year, Faculty of Medicine, University of Tabuk. Email: 421002511@stu.ut.edu.sa

١- ادرس بذكاء وليس بجهد.

٢- ضع خطة هدفها الانجاز وليس الكمية.

٣- قسم وقتك، خصص وقت لحياتك الشخصية.

٤- ركز!! فالتركيز يقلل من وقت المذاكرة بنسبة ٥٠٪.

٥- ادرس مع مجموعة من اصدقائك.

٦- احرص على اخذ استراحة قصيرة.

1. Study smart, not hard
2. Make a plan aiming to achieve quality, not quantity.
3. Divide your time. Keep time for your personal life.
4. FOCUS!! A good focus can decrease 50% of study time
5. Study with a group of your friends.
6. Make sure to take a short break
