4. Course general Description:

This course is concerned with introducing students to the meaning of language. It starts with illuminating the difference between semantics and pragmatics. The course gives a basic understanding of concepts within the fields of semantics and pragmatics. Various concepts are illustrated, both theoretically and through the execution of problem-based exercises. Within the field of semantics, the emphasis will be on types and dimensions of meaning, lexical semantics, contextual variability of word meaning, paradigmatic sense relations of inclusion, and paradigmatic relations of exclusion and opposition. Pragmatics covers the topics of entailment, presupposition, the cooperative principle, implication, speech acts, and politeness.
