## In and Around Tabuk

Agricultural tourism is a form of tourism that provides the joy of farming, giving rise to a unique form of experience. Agro-tourism is gaining popularity due to increased urban life. There are many farms in and around Tabuk that gives the chance of agro-tourism- Dr. Tanveer.

# MedEdu Tabuk

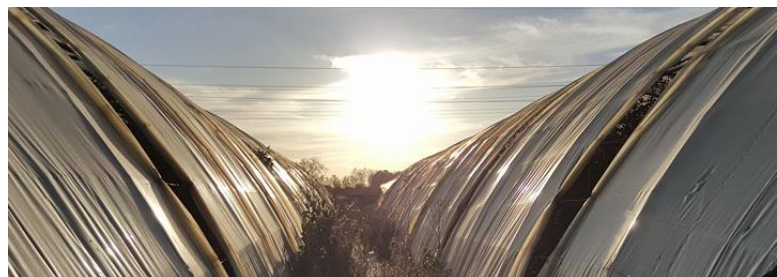

## Weekly Newsletter

Department of Medical Education, Faculty of  
Medicine, University of Tabuk

**Over 500 !!!**

### Message From the Editor

Since last week, both male and female students from 2<sup>nd</sup> to the final year have been receiving our newsletter. From this week, students of the preparatory year will be receiving MedEdu Tabuk. This creates a huge reader base for our newsletter and we hope Inshalalh, to further widen our reader base in the future.

## THIS WEEK LAST WEEK

## STUDENT SECTION

### **PREPARATORY YEAR ENGLISH ACTIVITY REHEARSAL** **Khaled Alasmarei, Preparatory Year**

On Thursday 8<sup>th</sup> of Feb, we had the rehearsal of the English day event at the auditorium 1 in front of the Dean of the Faculty of Medicine, Dr. Marai Alamri and group of administrations of the faculty.

The rehearsal started at 12 P.M , there was three sections of this event.The student Khaled Alenizi who was the moderator starts the event by introduce the students.

First was the debate section which was about PYP (preparatory year program) which the students Abdulrahman Malaeb, Fahad Aljodrawi(With Team) , Ibrahim Albalawi and Faisal Alghamdi (Against Team) . They debated on the PYP.

Then, the second section was the interview, the student Khaled Alasmari and the student Mohammed Alatawi. Did that section with Dr. Tanveer Raza

Finally the last part was the Corporal punishment debate, which the debaters are Ahmed Alqahtani, Abdulwaheed Alenizi (Against Team), Sultan Alrowali, Moath Alhamdi(With Team). The rehearsal finished at 1.30pm.

## GCC ORAL HEALTH UNIFIED WEEK

**Dr. ASMAA SOLIMAN**

Dental disorders: Dental caries, Periodontitis and gum diseases.

Gulf cooperation council is a regional intergovernmental political & economic union consisting of Saudi Arabia, Kuwait, Oman, Qatar, United Arab Emirates, and Bahrain.

World oral health day is observed annually on 20 March.

In 2017, medical team in GCC oral health unified week visited, 3 schools and students club in Riyadh city on 23-27 March for school preventive oral dental programs.

- > In Saudi Arabia many dental surveys showed high caries experience among school children.
- > To provide dental health care for students in the primary schools
- > The dental services should have fully staffed and equipped mobile with fixed dental clinics to provide screening, minor dental treatment, and referral for comprehensive dental care.

### **OBJECTIVES OF THIS PROGRAM**

- 1- Increase oral health awareness among school children.
  - 2- Provide regular examination in order to make repairs in early stages of disease or decay.
  - 3- Seal the fully erupting molars of the school children in the primary schools, apply A traumatic Restorative Treatment (ART ). Apply Fluoride Gel and inform about the importance of diet.
- 
- The dental team in each mobile include two dentists, two assistants who visit the primary school after arrangements and consent approved by the student parents.
  - The mobiles visit schools for girls and boys, every day of the working week from 8 AM to 12 PM.
  - The van has two dental chairs and x-ray facility.

### **Conclusion**

This program were:

- 1- Effective way to reduce new caries incidence.
- 2- Improve oral hygiene.
- 3- Establish positive oral health practices among schoolchildren.

### **Recommendations:**

- 1- The importance of law and policy of public health in the GCC region
- 2- School based dental preventive programs should be directed to preschool children , grade 1, and grade 2 in the primary schools because early intervention will prevent and delay onset of caries

3- Sealant program is an important oral health intervention should be considered in any oral health policy for children
