This week we celebrate our 50th issue. It is a major milestone for our team. We like to thank everyone for their continuos support.

INAUGURATION OF THE NEW COMPUTERIZED EXAMINATION CENTER, FACULTY OF MEDICINE

The new Computerized Examination Centre was inaugurated at the Faculty of Medicine, University Tabuk by the Dean **Dr. Marai M. Alamri**. Sixth year Female students of the Faculty of Medicine had their Final Surgery and Subspecialties Module MCQ Exams.

Computer-based Testing has developed successfully and educators around the globe have started to adopt this method.

FACULTY DEVELOPMENT

Tareq Almaghrabi MD

Neurocritical care and vascular neurology consultant
Assistant Professor Department of Internal Medicine
Head of Biochemistry department
Faculty of Medicine, University of Tabuk

Faculty development is a process by which medical school faculty, including preceptors teaching in the clinical setting, work systematically to improve their skills in the following areas:

- (1) Educational skills
- (2) Leadership skills
- (3) Skills necessary to engage in scholarly activities
- (4) Personal development
- (5) Skills in designing and implementing a professional development plan

Faculty development activities are successful when individuals' goals in these five areas are being met and when simultaneously the goals of the organization are being met.

Domains/Areas of Faculty Development

- Teaching
- Instructional Design and Curriculum Development
- Scholarly Activity including writing, conducting research, presenting at conferences, etc.
- Leadership, Administration, and Organizational Development
- Personal and Professional Development

Benefits of Faculty Development

The students of the Faculty of Pharmacy, University of Tabuk visited Tabuk Pharmaceutical manufacturing company

**Dr. Ayman Garwan,
Department of Pharmaceutics,
Faculty of Pharmacy,
University of Tabuk.**

In accordance with the care given to the development of the faculty students and the belief in the importance of qualifying the students to cope with the labor market needs and under the guidance of the Faculty Dean doctor Alaa Ben Abdullah Bagalagel, Pharmaceutics Department held a field trip for the fourth-year male and female students to Tabuk Pharmaceutical manufacturing company, which is the second biggest company for pharmaceutical industries in KSA.

The purpose of the visit was to introduce our students to the latest technology used in Pharmaceutical manufacturing and applying the theoretical study provided in the faculty.

The visit started by welcoming the students by the company employees and giving a brief introduction about the company and the size of its activity, the medicines produced by the company, the future plans and the ambitions of getting a share in the European markets.

Then, the students visited the production line and they experienced the different manufacturing stages of tablets and capsules and knew the devices used in each stage comparing them to what they studied.

At the end of the visit, we expressed our gratitude for the company employees for their hospitality and well-organization.

From their side, the employees of the company praised the academic level of our students, their immediate cooperation with the production supervisors and the excellence in answering all the questions that were addressed to them. They also showed their willingness to hire our students to work in the company after they graduate stating that the Faculty of Pharmacy, Tabuk University will provide the company with highly-qualified pharmacists.
