Community Outreach Programs of SMJS-MET

SMJS-MET is committed to achieving the Mission and Goals of University of Tabuk of social responsibility. As part of our Social responsibility, SMJS-MET initiates Community Outreach Programs. School students in their final years must find out as much as possible about their future career options to choose the right career track according to their hopes and aspirations. Ergo, we encourage activities that will allow the students to interact with faculty members, students, and staff of University of Tabuk. We have organized multiple visits of students from different faculties talking about their profession

Tabuk International School Students visit Faculty of Medicine

Green University Initiative (GUI), at University of Tabuk

Dr Mohammad Nurul Alam

Dr Imdadullah Hedayetur Rahman

Faculty of Business Administration, University of Tabuk

Tel: +966547251928, Email: mnurulalam@ut.edu.sa

The term 'Green' has been applied to different fields of life including energy, production, technology, and finance. The history of diffusion of 'Green' is going back to the early 1990s when the concept of 'Greening of the Universities' was coined. In 2000s, the terms 'Green University', 'Green Campus', and 'Green Curriculum' evolved. It resulted in more awareness about sustainable environmental protection. The universities are working on sustainable environmental protection not only through research but by implementing through environmental friendly infrastructure. Presently, more than 300 universities worldwide are working on 'Green Campus Initiatives'.

They are not only interested in educational quality but also they are concerned about competitive advantage. Investing on 'Green Campus Initiatives' is not only helping sustainable environment but it can lead to considerable reduction in energy costs.

Keeping in view the importance of sustainable environment and green campus, the University of Tabuk (UT) initiated 'Green University Initiatives (GUI)' mission since 12th February 2023. For this purpose, the first meeting was held which was presided by His-Excellency, the Vice-Rector Dr Saleh Al Harbi, the Dean of Business School Dr Majed Alsolamy, Dr Mohammad Nurul Alam, Dr Imdadullah, Dr Omaimah, Dr Emad, Dr. Wael Alrashed, and Dr Abderrahim Lakhouti.

The GUI started with seven initial objectives such as OBJ-01: Energy Use and Conservation (EUC), OBJ-02: Waste Reduction and Recycling (WRR), OBJ-03: Water Management (WM), OBJ-04: Travel and Transport Management (TTM), OBJ-05: Site for Promoting Biodiversity (SPB), OBJ-06: UT as a Centre for Climate Justice (CCJ), and OBJ-07: Using Green Chemistry at UT (UGC). Today (14.03.2023) during the second follow-up meeting, the participants have been requested to submit their proposals with revised objectives and action plan so that a framework can be developed underneath of that the whole program can be executed. After implementation and completion of this project, the University of Tabuk will be reputed worldwide for green campus initiatives, biodiversity, and environmental justice.

A delegation from Abdel Hamid Ben Badis, Algeria visits the Clinical Simulation Center, Faculty of Medicine, and SMJS-MET Office at University of Tabuk

ابراهيم طرق الجندي, كلية العلوم

Email: 431011665@stu.ut.edu.sa

A delegation from **Abdel Hamid Ben Badis University** comprising of **Prof. Fawzia Kambouch**, Deputy Dean of Scientific Research and **Prof. Mohammed Riad**, Head of the Clinical Simulation Centre visited University of Tabuk on the invitation of **Associate Prof. Dr. Badr Alsayed**, Director of the Clinical Simulation Center (CSC), University of Tabuk on December 25-26th, 2022.

During their visit, the delegates received a tour of the CSC at University Tabuk. They were apprised about the state-of-the-art facilities at the Simulation Center. The delegates were impressed about the advanced technology.

The delegates later visited Dr. Marai M. Alamri, Dean of Medicine. He looked forward in developing a successful cooperation with Abdel Hamid Ben Badis University.

The Vision of University of Tabuk is "educationally and academically distinguished which corporated in community service". University of Tabuk seeks to be a beacon in the fields of education and development, and is committed to serve the people of the region. At par with the University's commitment, Dr. Badr assured them of all possible cooperation from the Clinical Simulation Center.

The visitors left with an impression of a very successful trip and looked forward to future collaborations

The delegates later visited the Saudi Medical Journal for Students & MedEdu Tabuk (SMJS-MET). **Dr. Tanveer Raza**, Editor-in-Chief, informed them about the Journal and invited students from the visitors University to join SMJS-MET.

Smell Retraining Therapy (SRT)

How We Smell ..?

Our ability to smell comes from special sensory cells found high inside the nose, they send messages to our brain, which identifies the smell.

What is Olfaction Disorder?

A decrease in the ability to smell

or changes in the way they perceive odors.

Thats lead to diminished quality of life.

What is Olfaction Training (Smell Retraining Therapy) SRT?

Olfactory training is a simple option for patients with smelling dysfunction. Patients undergoing olfactory training expose themselves to 4 different odors twice daily for at least 24 weeks.

How it is done ?

repeated presentation of different 4 smells through the nose to stimulate the memory of that smell.

1

rose (floral)
الورود

lemon (fruity)
ليمون

cloves (spicy)
فلفل

eucalyptus (resinous)
الكافور

start with

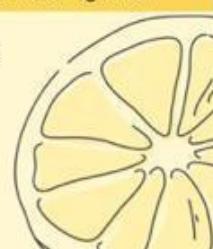

2 Take sniffs of each scent for 10 to 20 seconds at least once or twice a day.

3 While sniffing, Try to concentrate on your memory of that smell.

4 After each scent, take a few breaths and then move on to the next fragrance.

What is the Indication ?

post-infectious, post-traumatic, and idiopathic olfactory dysfunction and olfactory dysfunction due to Parkinson disease.

DUPHAT: Experience of Undergrad Pharmacy Students to an international conference

Danah Alharbi, Raghad Almahlawi, Raneem Albalawi, Amaal Albalawi
PharmD Candidates, Faculty of Pharmacy, University of Tabuk, Tabuk, Saudi Arabia
Email: Danaalharbi36@gmail.com ,ra.almahallawi@gmail.com, Ranim.ayed0@gmail.com, amaalalbalawi1421@gmail.com

DUPHAT is an international conference that takes place annually in Dubai, United Arab Emirates (UAE). It features world-renowned speakers, such as pharmaceutical industry leaders, policy makers, and physicians, as well as key information about the latest developments in medicine. From presentations about the latest pharmacological research and novel pharmaceutical solutions to informative seminars and interactive discussions, DUPHAT offers something for everyone.

Attending the DUPHAT Conference, the premier pharmaceuticals conference in the Middle East, is an experience that should not be missed by any aspiring pharmacy student. As one of the most prestigious and interactive conferences in the world, DUPHAT offers unparalleled opportunities to learn, network, and make important connections. Every year, pharmacy students from around the world flock to the conference in hopes of gaining insight on the ever-evolving medical landscape.

DUPHAT offers an exceptional opportunity for pharmacy students to participate in a scientific poster presentations. It begins by submitting an abstract of the topic to be presented, these abstracts are evaluated and then those who are accepted will receive an acceptance email with the details to complete the registration by paying the fees and the roles for the poster to be presented. The conference is held for 3 days in a row, for last year's DUPHAT it was held in Dubai from 10-12 of January. And each student will be evaluated for his/her poster at any day of these 3 days. At the end of day 3, the evaluators will decide the winners, 5 places in each category.

Educational conferences like DUPHAT are a great opportunity to know the traditions of other countries around the globe. Visiting Dubai was one of the most interesting experiences that we've ever done, the architecture there is eye-catching. Besides the architecture, the people there were so nice and generous. It is not only Dubai that we discovered. As we mentioned earlier there were students from all over the world, they gave us a glance at their countries and traditions.

Exposure to different scholars from around the world offers the chance to learn from a diverse worldwide group of specialists. This helps us comprehend various cultures and methods of learning better. For instance, we personally attend a presentation given by a professor from Florida's Nova Southeastern University about how to publish our research. A student's perspective will widen as a result of interacting with other students from different countries. They will learn to respect and comprehend various cultures through this. We come across a group of students from South Korea who've been participating in DUPHAT, this was helpful and contributes to our growing appreciation of the cultural variety and comprehension of different worldviews.

It is a great honor for any student to be on the Dean's honor list. We, the Editors of (SMJS-MET) are very proud of our colleague, **Norah Abdullah Albdaya**, from the Faculty of Medicine, **Imam Mohammad bin Saud Islamic University (IMSIU)**, to be on the Dean's Honor list of her Faculty. We want to congratulate her on her great success. We are happy to have her in our team. May Allah grant her continuous successes

انه لفخر عظيم لأي طالب التواجد في قائمة العميد (SMJS-MET) الشرفية ولذا فنحن المحروون من مجلة فخورين جداً بزميلتنا نورة بنت عبدالله البديع من كلية الطب بجامعة الامام محمد بن سعود الاسلامية لتواجدها في قائمة العميد الشرفية الخاصة بكليتها كما نود ان نبارك لها نجاحها الباهر كما نحن فخورون بتواجدها معنا سائرين الله التوفيق لها والتفوق الدائم.
